CITROËN C1
During the 90s Le Tone had a major hit, “Joli Dragon”, and devoted himself to music for 15 years before progressively moving towards illustrative art. Since 2011 his creations have been exhibited in famous places such as the Pompidou Centre. An admirer of artists who know how to make the best use of colour, Le Tone confesses to having a weakness for black and white, which he uses to tell simple stories by using felt pen drawings in notebooks.

### Citroën Warranty

**Every new Citroën car has the benefits of a 3 year* warranty package, plus a 12 year anti-perforation** ** and a 3 year paint warranty.**

*Figures shown are for comparison purposes only; you should only compare these fuel consumption and CO2 figures with other cars tested using the same technical standard. The fuel consumption figures and CO2 emissions are derived using a number of factors including the accessory fitted (trim level), weather conditions, driving style and vehicle load. They are intended to provide a low estimate of fuel consumption and CO2 emissions. The actual fuel consumption and CO2 figures shown may vary depending on a number of factors: including the accessories fitted (post registration), weather conditions, driving style and vehicle load. There is a new test WLTP (Worldwide Harmonised Light Vehicles Test Procedure) used to measure fuel consumption and CO2 figures. The CO2 figures shown are NEDCeq (New European Driving Cycle Equivalents), calculated using an EC correlation tool which converts NEDC figures to WLTP. These WLTP figures are based on the outgoing technical standard and will be varied to calculate the figures for the first registration. CO2 and fuel economy figures may vary according to wheel/trim and optional extras fitted.

*Figures shown are for comparison purposes only, cars should only compare these fuel consumption and CO₂ figures with other cars tested using the same test method and standard. The fuel consumption and CO₂ figures for vehicles with an automatic transmission and CO₂ produced in real-world conditions will depend on the driving style and on other factors such as the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test (WLTP) harmonised worldwide test procedure that has been introduced to measure fuel consumption and CO₂ emissions. This will be used to calculate future vehicle tax bands. CO₂ and fuel economy figures may vary according to wheel fitment and optional extras fitted.
